Ouassim Behlil

Data Analyst

I am driven by my passion for data-driven decision-making and problem-solving. My proficiency in various data analysis tools and techniques, including statistical analysis, data visualization, and machine learning, allows me to effectively manage complex data and generate valuable insights.

Core Skills

- Skilled data analyst proficient in SQL, Python, Excel, and Power BI.
- Can manipulate, clean and analyze large datasets.
- Expert in creating visually appealing and interactive dashboards.
- Problem-solving by leveraging data analysis and critical thinking skills.
- Experienced in project management and cross-functional collaboration.

Academic History

Faculty of Science and Technology of Al-Hoceima
Bachelor of Mathematics and Computer science, 2021-2022

Faculty of Science and Technology of Al-Hoceima
Diploma of scientific and technical studies, 2019-2021

College Al-Badissi Al-Hoceima
2018 - 2019 BAC SM-A French option

Projects

Analyze customer churn and identify factors contributing to churn

- Conducted analysis of customer churn by analyzing data on customer behavior.
- Utilized Power BI to create an interactive dashboard to identify factors contributing to customer churn.
- Identified patterns in customer behavior to create targeted retention strategies.

Tools: Power Bi an EXCEL

Conducted web scraping of products from AliExpress to identify winning products

- Conducted web scraping of products from AliExpress using Python and Selenium.
- Stored the scraped data in SQL databases and analyzed the data to identify winning products.

Tools: PYTHON, SQL and SELENIUM.
